

Reconditioning Best Practices

AutoZone, a leader in automotive parts and affiliate Alldata, the online source for OEM information, will discuss ways to lower reconditioning costs and manage your make-ready and recon repairs more effectively. What parts should you buy? What is the true cost of recon mistakes? How can you determine historical repairs on vehicles before you acquire them? How do you obtain current vehicle recall information? Your recon expenditures are some of the most difficult to control so attend this workshop and avoid making costly mistakes. AutoZone/NABD has just conducted a national survey on reconditioning. Visit the AutoZone booth and learn what we found from the survey results.
