

Current Developments Update

Wednesday, May 24, 2017 (2:15pm – 3:00pm)

Track Two • Encore Ballroom 4-8

There have been numerous important developments in the BPH industry during the last year which attendees must be aware. We have selected experts from several trade publications, and the Executive Director of NIADA, and a leading industry CPA who together will discuss a new accounting standard, legislative development, legal and regulatory compliance issues and other important matters. This session will be interactive so you can ask questions and get answers on all these important developments. During this conference, we will explore each subject in greater detail. Attend this session if you want to “get current” on all the important developments for your industry and don’t leave the conference without the answers!
